

## CorelDRAW

Select "FILE"  
Select "IMPORT"  
Select "PS,PRN,EPS" or "AI" as type of file  
Select Drive & Directory (your Cd-Rom or the folder where you extracted the zip file content) and locate the file you wish to import  
Select the file  
Click on "OK"

## Gerber

From the Composer module Select "FILE"  
Select "IMPORT"  
From IMPORT OPTIONS  
Screen Select "OPTIONS"  
From OPTIONS Screen  
Turn "IGNORE STROKE ONLY DATA" OFF  
Turn "USE PROCESS COLOR FOILS " ON  
From IMPORT Screen Select "IMPORT" Choose EPS (Encapsulated Postscript) as file type  
Select "FILE"  
Select "OPEN"  
Select Drive & Directory (your Cd-Rom or the folder where you extracted the zip file content) and locate the file you wish to import  
Click on "OK"  
Click on "CONVERT"

NOTE: For Gerber 6.2 Users, turn "Use Stroke Paths" on -You may need to scale it twice, by 1000% then again by 200%

## Adobe Illustrator

Select "FILE"  
Select "OPEN"  
Select "AI" as type of file  
Select Drive & Directory (your Cd-Rom or the folder where you extracted the zip file content) and locate the file you wish to open  
Select the file  
Click on "OK"

NOTE: Illustrator operates on a specific page size, thereby limiting the size you can resize to. You will not be able to resize the vehicle up 2000% because of limited page size. To solve this problem, you can work on the vehicle at the 1:20 scale and to find your final dimensions multiply measurements by 20.

## Anagraph

Select "FILE"  
Select "IMPORT"  
Select "Adobe Illustrator EPS,AI" as type of file  
Select Drive & Directory (your Cd-Rom or the folder where you extracted the zip file content) and locate the file you wish to merge  
Select the file  
Click on "OK"

## Casmate

Select "FILE"

Select "IMPORT"

Select "EPS"

Select Drive & Directory (your Cd-Rom or the folder where you extracted the zip file content) and locate the file you wish to import

Select the file

Click on "OK"

## Troubleshooting

Select "Group All" from the Hypergroup Menu

Click COUNTERCLOCKWISE from the HYPERGROUP Menu

Click on the Sort Button or select "Sort" from the Miscellaneous Menu

Click on the PREVIEW Button

With the Pointer Tool, select the black layer in front of the image and delete it

Click on the "Set Color" Button and choose "Set Color" from the Edit Menu

With the Paintbrush Tool, paint the body (and Door(s)) the color you wish the vehicle to be.

With the Pointer Tool, select the body and doors you have just painted and arrange them "to back". (Edit Menu/Arrange/Send to back)

NOTE: Any other black images, e.g. doors, bumpers, mirrors may be duplicate shapes and as such, may be deleted. Some shapes may need to be sent to back. When printing a white vehicle you must place a thin black outline around the body and door(s) of the vehicle.

## Flexisign

Select "FILE"

Select "MERGE"

Select "EPS" as type of file

Select Drive & Directory (your Cd-Rom or the folder where you extracted the zip file content) and locate the file you wish to merge
